College Management System

Comprehensive College Management Application

Developed by: Harikrishnan G

Email: harikrishnan14122000@gmail.com

FEATURES:

1. Attendance Management System

- Track student attendance records
- Generate attendance reports
- Export attendance data to Excel

2. Hall Chart Generation

- Create seating arrangements for exams
- Generate hall charts with student details
- Export hall charts as PDF

3. Exam Schedule Creation

- Create and manage exam schedules
- Assign subjects to time slots
- Generate exam timetables

TECHNOLOGIES USED:

- Python 3.x
- Tkinter (GUI Framework)
- ReportLab (PDF Generation)
- openpyxl (Excel Integration)
- SQLite (Database)

KEY FEATURES:

- User-friendly GUI interface
- Database integration for data storage
- PDF and Excel export capabilities
- Automated report generation
- Data validation and error handling

APPLICATION SCREENSHOTS:

The application includes multiple windows for:
- Student registration and management
- Attendance marking interface
- Hall chart generation tools
- Exam schedule creation forms
- Report generation and export
